## Washington Area Employment – January 2018

### Area's Rate of Employment Growth Matches the National Average

Total nonfarm employment for the Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Statistical Area stood at 3,258,500 in January 2018, up 43,800, or 1.4 percent, over the year, the U.S. Bureau of Labor Statistics reported today. During the same period, the national job count also increased 1.4 percent. Sheila Watkins, the Bureau's regional commissioner, noted that the Washington area's January increase was its 46<sup>th</sup> consecutive over-the-year employment gain. (See [chart 1](#) and [table 1](#); Technical Note at end of release contains metropolitan area definitions. All data in this release are not seasonally adjusted; accordingly, over-the-year analysis is used throughout.)

**Chart 1. Total nonfarm employment, over-the-year net change in the Washington metropolitan area and its divisions, January 2013–January 2018**

Net change (in thousands)

Source: U.S. Bureau of Labor Statistics.

The Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Statistical Area is made up of two metropolitan divisions--separately identifiable employment centers within the greater metropolitan area. The Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Division, with 82 percent of the area's

employment, gained 37,500 jobs over the year. The Silver Spring-Frederick-Rockville, Md. Metropolitan Division, which represented the remaining 18 percent of area employment, added 6,300 jobs since January 2017.

## Industry employment

In the greater Washington metropolitan area, leisure and hospitality had the largest employment gain from January 2017 to January 2018, adding 13,000 jobs. The Washington area's 4.2-percent growth in leisure and hospitality employment was nearly twice as fast as the 2.2-percent increase nationally. (See [chart 2](#).) Almost all of the local job gains in this industry were in the Washington division.

Since January 2017, the second and third-largest employment gains in the Washington area were in professional and business services (10,700 jobs) and education and health services (10,000 jobs). The local rate of job growth in professional and business services (1.5 percent) was slower than the rate for the nation (2.2 percent) while local job growth in education and health services (2.3 percent) exceeded the national rate (2.1 percent).

**Chart 2. Total nonfarm and selected industry supersector employment, over-the-year percent change, United States and the Washington metropolitan area, January 2018**

Source: U.S. Bureau of Labor Statistics.

Government was the only supersector to lose jobs in the Washington area from January 2017 to January 2018, declining by 2,900. The local rate of job loss in this industry was 0.4 percent, while nationally government employment was unchanged over the last 12 months.

## Employment in the 12 largest metropolitan areas

Washington-Arlington-Alexandria was 1 of the nation's 12 largest metropolitan statistical areas in January 2018. All 12 areas had over-the-year job growth during the period, with the rates of job growth in 6 areas exceeding the national increase of 1.4 percent. Phoenix-Mesa-Scottsdale had the fastest rate of job growth, up 2.7 percent, followed by Dallas-Fort Worth-Arlington, up 2.4 percent. Chicago-Naperville-Elgin had the slowest rate of job growth, 0.5 percent. (See [chart 3](#) and [table 2](#).)

**Chart 3. Total nonfarm employment, over-the-year percent change, United States and 12 largest metropolitan areas, January 2018**

Source: U.S. Bureau of Labor Statistics.

Los Angeles-Long Beach-Anaheim added the largest number of jobs over the year, 114,600, followed by New York-Newark-Jersey City, up 104,000. Boston-Cambridge-Nashua had the smallest employment gain over the year, adding 22,400 jobs. Chicago and Philadelphia-Camden-Wilmington each added 23,200 jobs. Annual gains in the remaining seven metropolitan areas ranged from 85,800 in Dallas to 29,700 in Miami-Fort Lauderdale-West Palm Beach.

Over the year, education and health services added the most jobs in five areas: Chicago, Los Angeles, New York, Philadelphia, and Phoenix. Professional and business services gained the most jobs in four areas: Boston, Houston-The Woodlands-Sugar Land, Miami, and San Francisco-Oakland-Hayward.

**Metropolitan area employment data for March 2018 are scheduled to be released on Friday, April 20, 2018, at 10:00 a.m. (ET).**

### **Technical Note**

This release presents nonfarm payroll employment estimates from the Current Employment Statistics (CES) program. The CES survey is a Federal-State cooperative endeavor between State employment security agencies and the Bureau of Labor Statistics.

**Definitions.** Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period which includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2012 version of the North American Industry Classification System.

**Method of estimation.** CES State and Area employment data are produced using several estimation procedures. Where possible these data are produced using a "weighted link relative" estimation technique in which a ratio of current-month weighted employment to that of the previous-month weighted employment is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are then obtained by multiplying these ratios by the previous month's employment estimates. The weighted link relative technique is utilized for data series where the sample size meets certain statistical criteria.

For some employment series, the sample of establishments is very small or highly variable. In these cases, a model-based approach is used in estimation. These models use the direct sample estimates (described above), combined with forecasts of historical (benchmarked) data to decrease volatility in estimation. Two different models (Fay-Herriot Model and Small Domain Model) are used depending on the industry level being estimated. For more detailed information about each model, refer to the BLS Handbook of Methods.

**Annual revisions.** Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports which are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

**Reliability of the estimates.** The estimates presented in this release are based on sample survey and administrative data and thus are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data are also subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the special estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

**Employment estimates.** Measures of sampling error for the total private employment series are available for metropolitan areas and metropolitan divisions at [www.bls.gov/sae/790stderr.htm](http://www.bls.gov/sae/790stderr.htm). Measures of sampling error for more detailed series at the area and division level are available upon request. Measures of sampling error for states down to the supersector level are available on the BLS website at [www.bls.gov/sae/790stderr.htm](http://www.bls.gov/sae/790stderr.htm). Measures of nonsampling error are not available for the areas contained in this release. Information on recent benchmark revisions is available online at [www.bls.gov/web/laus/benchmark.pdf](http://www.bls.gov/web/laus/benchmark.pdf).

**Area definitions.** The substate area data published in this release reflect the delineations issued by the U.S. Office of Management and Budget on July 15, 2015. A detailed list of the geographic definitions is available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

The **Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Statistical Area** includes the District of Columbia; Arlington, Clarke, Culpeper, Fairfax, Fauquier, Loudoun, Prince William, Rappahannock, Spotsylvania, Stafford, and Warren Counties, and Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park Cities in Virginia; Calvert, Charles, Frederick, Montgomery, and Prince George's Counties in Maryland; and Jefferson County in West Virginia.

- The **Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Division** includes the District of Columbia; Arlington, Clarke, Culpeper, Fairfax, Fauquier, Loudoun, Prince William, Rappahannock, Spotsylvania, Stafford, and Warren Counties, and Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park Cities in Virginia; Calvert, Charles, and Prince George's Counties in Maryland; and Jefferson County in West Virginia.
- The **Silver Spring-Frederick-Rockville, Md. Metropolitan Division** includes Frederick and Montgomery Counties in Maryland.

### **Additional information**

More complete information on the technical procedures used to develop these estimates and additional data appear in Employment and Earnings, which is available online at [www.bls.gov/opub/ee/home.htm](http://www.bls.gov/opub/ee/home.htm). Industry employment data for states and metropolitan areas from the Current Employment Statistics program are also available in the above mentioned news releases and from the Internet at [www.bls.gov/sae/](http://www.bls.gov/sae/).

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
